

Municipality of Meaford

NOTICE OF PRELIMINARY ENGINEERING SITE WORK

Algonquin Drive and Lakeshore Road

The Municipality of Meaford has engaged R.J. Burnside & Associates Limited to complete detailed engineering design on Algonquin Drive and Lakeshore Road (Ford Avenue to Centreville Road). The construction is tentatively scheduled to commence in 2023 and will include road reconstruction and underground infrastructure replacement.

The first stage of the design process is to accurately establish existing conditions along the corridors by completing various field investigations. Over the next few months, the following work will be carried out on site and is not expected to have any significant impacts on access to adjacent properties.

Surveying – To verify existing ground features within the roads' Right-of-Way and adjacent residential properties.

Soil Testing – To identify existing underground soil and water conditions to assist in the design and reconstruction of the infrastructure.

Utility Locates – Utility companies will be marking the location of their underground infrastructure such as water services, gas, hydro, telecommunications, etc. Flags or temporary paint may be used to mark the locations.

Tree Inventory – Arborists will complete an assessment of trees within and adjacent to the roads' Right-of-Way, including potential impact areas where tree pruning or removals may be required.

If you should have questions about any of the engineering investigations, please contact one of the following:
