**2020 ROAD SURFACE RESURFACING PROGRAM
 ROAD SURFACE PULVERIZING AND GRINDING NOTICE**

Dear Land Owner and/or Resident

The Municipality of Meaford Transportation & Fleet Services will be performing pulverizing and grinding as the first stage of the 2020 Road Resurfacing Program along the following roadways that your property fronts onto:

Side Road 33, 6th Concession South and Portions of the St. Vincent Sydenham Townline

Works to be completed in your area will start Tuesday May 19th and continue periodically over the upcoming months depending on the activity. Work will include, but not limited to:

| | |
|--------------------------------|--|
| What's Happening to Your Road? | Your road has been identified to get a new surface as part of the Municipality of Meaford's 2020 Road Resurfacing Program |
| Pulverizing & Grinding | The existing road surface scheduled to be ground in place starting May 19 th which will result in your road looking like a gravel road. As part of the work additional granular material to be applied. Dust can be expected, dust suppressant will be applied as required during the process. The work will take no more than a couple of days to complete. |
| Traffic Delays | Efforts will be made to maintain one lane of traffic while the work is taking place. However, delays can be expected. |
| Adapting to Driving Conditions | Even the best maintained gravel roads have rough sections and loose gravel that require lower speeds. It takes longer to safely stop on gravel roads, and dust can decrease your visibility. Even under the best conditions, it's best to allow at least six seconds of following distance on gravel. |
| What's Next | Once the pulverizing is complete, there is still work that needs to take place before the new surface is applied. During the months of May and June, ditches will be maintained, there may be culverts that need to be replaced, and vegetation/trees that need to be trimmed or removed. |
