

Notice of Project Commencement

St. Vincent Street Construction

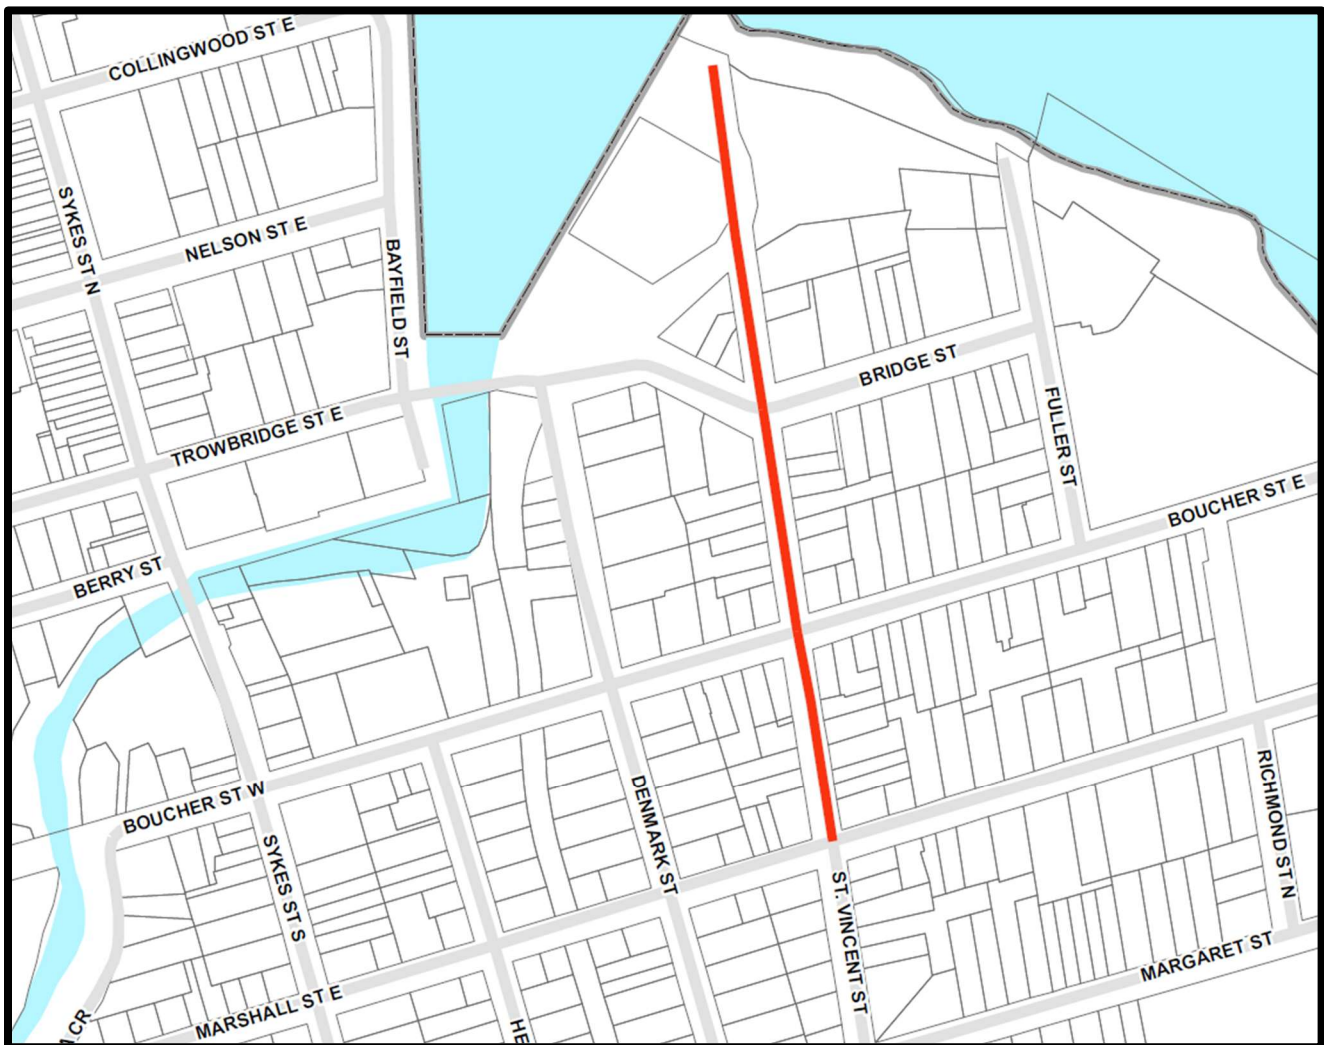

June 18, 2026

Dear Property Owner/Resident,

The Municipality of Meaford has engaged Tatham Engineering Limited to complete preliminary and detailed design for St. Vincent Street.

The design phase of the project is to be completed in 2026 and construction is anticipated between April 2027 and November 2027

The project will include the **reconstruction** of **St. Vincent Street** from Marshall Street East to Meaford Harbour.

The reconstruction work will address aging and deteriorated infrastructure such as sanitary sewers, storm sewers, watermains, sidewalks, and the asphalt roadway. The work will also explore the addition of sidewalks to both sides of St. Vincent Street between Marshall Street East and Boucher Street East, and from Bridge Street to Meaford Harbour.

Notice of Project Commencement

St. Vincent Street Construction

How will the project impact you?

- Surveying:** Surveyors will be on site in the coming months to document existing surface features and property bars within the Right-of-Way and adjacent residential properties.
- Soil Testing:** Drilling operations will be completed to identify existing underground soil and water conditions and will require temporary disruption of traffic flow for 1-2 days to complete.
- Utility Locates:** Utility companies will be marking the location of their underground infrastructure such as water and sanitary services, gas, hydro, telecommunications. Flags or temporary paint may be used to mark the locations. It may also require excavation by a Hydrovac Truck.
- Tree Inventory:** Arborists will complete an assessment of trees within and adjacent to the Right-of-Way and may place temporary flags or paint to trees within the project area.

How can you help?

Property owners should remove private landscape features within the road right-of-way prior to construction and are encouraged to notify the project team of any sump pump, downspout discharge pipes, subdrains, sprinklers, underground dog fence, or other similar features within the road right-of-way.

Additional Information

Information on the project will be posted to the municipal website at www.meaford.ca/en/capital-projects.aspx
